Race 1

ANALYSIS & WAGERING

Overview

Skinny Joey and Capt. Candy bring committed speed, while Cojelo Pa Ti, Little Lance and Romantic Gamble keep the front end busy. The early lean makes a forward survivor dangerous, but it does not erase the pressure. Cojelo Pa Ti owns the strongest Prime Power, and Little Lance owns the best combined pace. Their contrasting finishing profiles matter more than simply counting early horses. Lord Winsalot supplies the most balanced finishing alternative and can exploit a genuinely contested run. Mr. Mendelssohn has late strength and a reviewed deep-close exception, although...

Race 2

ANALYSIS & WAGERING

Overview

Weekend Honor is scratched, removing the original strongest Prime Power runner and a major finishing reference. Luv Queen E becomes the morning-line favorite among the active field. She has a clear speed profile and earns a pace-controller factor from her early-figure advantage. That positive factor coexists with a weak finisher profile and several recent fades. Uptown Art and Miskita keep pressure credible and receive mismatch factors rather than being dismissed solely for their running styles. Miss Tifeye inherits the leading measured finishing profile and earns the...

Race 3

ANALYSIS & WAGERING

Overview

The owner FE override controls this race after the scratch of Show's Last Gift. South Street Sally is the known pace reference, but the field contains unexposed runners whose early ability cannot be ranked from the supplied past performances. No lone-speed bonus is inferred. The measured physical subset is particularly small: Edge of Hope and Diamond Dash have no supplied Prime Power or historical pace, while Victoria's Song lacks the E2 component needed for CB and FC. The B override on Victoria's Song is effective for classification and remains separate from those missing...

Race 4

ANALYSIS & WAGERING

Overview

Synoptic is scratched, leaving a five-runner field with low-pressure HONEST shape. Panama Limited is the most plausible control candidate, but the evidence does not support converting that possibility into a LONE bonus. Mo Attitude remains the principal measured win reference. Chiquita's Way has the strongest finishing composite, and Spoonbill combines a useful combined-pace position with tactical versatility. Joyful Joyce belongs in the vertical discussion even though her win profile is less forceful. The early lean gives Panama Limited a plausible path if he breaks...

Race 5

ANALYSIS & WAGERING

Overview

Best Bet and Prince Colton are committed speed types, with Thorsness adding credible pressure and Cowboy Mike able to race prominently. The early lean supports a forward survivor; it does not require that the two highest Quirin runners be the best survivors. Cowboy Mike has the strongest measured FC and combined pace after the reviewed long-distance call corrections. Recker Point supplies the leading market-independent win profile and a documented finishing alternative. Those two paths explain the two A horses: one leads the morning-line win engine and the other leads...

ANALYSIS & WAGERING

Overview

Several E/P runners can participate early, including Girvinized, Got Game and Magical Trick. Got Game has demonstrated the ability to survive pressure, so the FE label does not justify an automatic strong-mismatch penalty. Girvinized has enough combined-pace and finishing support to remain a credible survivor. Tariba Dream and I Can Run receive the two collapse-fit factors because their measured finishing evidence and striking positions meet the controlled criteria. They still face an early-lean surface. Lost Love has no qualifying dirt route within the review window and...

Race 7

ANALYSIS & WAGERING

Overview

Lecanto is scratched, but Backside, Point Barrow and Captain Oats preserve credible pressure. Point Barrow has the best measured combined pace and finishing composite and has already shown the ability to stay involved in a contested run. His profile explains why he remains the leading win reference without requiring a special positive ShapeFactor. Vino Gray and It's Authentic earn the collapse-fit slots from their finishing ranks and documented striking evidence. Quetzal Island can race tactically and remains important even though his Quirin profile excludes him from the...

Race 8

ANALYSIS & WAGERING

Overview

Eake, Bailout Billy and Persian provide the visible pace, with the remaining E/P runners capable of making the middle stages demanding. Eake's successful rating evidence prevents treating every prominent horse as a committed speed mismatch. Bailout Billy and Persian have less favorable survivor combinations under pressure and receive the two negative factors. Bellanova and Angie's Reward receive the collapse-fit slots. Their late ability is relevant to FE, although the early lean requires them to strike before the race gets away from them. Kool Karoline has a strong...

Race 9

ANALYSIS & WAGERING

Overview

Carbonite has the clearest Quirin advantage among the projected pace participants and enough documented survival support for a pace-controller factor. FE still applies because Dot's Dollar, Sophia's Prince and Big Brown Shoes keep pressure in the race. Jackson Road receives the collapse-fit factor with a reviewed successful deep-close exception. That factor recognizes suitability to the projected pressure; it does not remove the disadvantage of an early-lean surface or make the short price automatically attractive. All American Rod has the strongest measured vertical...
